

POOL & SPA ENCLOSURES

Why limit your use of your pool or spa?

There is no better feature in a backyard than a pool or spa to relax, unwind & entertain guests. So why limit its use to only the summer months?

Pergolas Plus can custom design & build a steel pool or spa enclosure to ensure maximum usability all year round creating the ideal entertainment forum.

Use your pool or spa all year round

At Pergolas Plus the designs are endless when it comes to creating a functional solution to ensuring all year use of your outdoor entertaining area.

Our experience has shown that when designing a pool or spa enclosure particular attention needs to be paid to:

- Pitched/curved roof—no drips of condensation
- Installation of Blinds—added airflow for ventilation to area & flexibility to adapt to all weather conditions
- Sun protection
- Safety standards & compliance

We choose Firmlock building systems. A solid steel construction, super strong, light weight and can create large spans. It is fire resistant and wont rot, shrink or rust.

Pergolas Plus Outdoor Living also manage all aspects relating to local Council permits & approvals.
