

# DECKING

## A perfect way to extend your Outdoor Area

Decking is a stylish addition to the home & greatly enhances your lifestyle options as well as adding value to your home.

We source & use only Australian Merbau Hardwood decking planks & constructed with Duragal steel sub-floor framing ensuring the deck is not only structurally safe but will stand the test of time.

## Versatile decking solutions – no matter what the outdoor area

The natural harmony & feel of hardwood decking is second to none & is also a practical way to extend your living area.

As timber decking is so versatile the options are endless for our design team when it comes to extending your outdoor living area & can also be used as a screening option for added privacy.

Our use of Duragal steel sub-floor frame will give you the added peace of mind as it is termite proof.

Decking is a cost effective solution for sloping sites often removing the need for expensive retaining walls at the same time maximizing the use of usable entertaining space.

Pergolas Plus skillfully design & construct decking that will add significant value to any home.
