

SOLAR SPAN—Insulated Roofing Systems

- Blocks Heat
- Deadens Noise
- Low Maintenance
- Saves Money, Adds Value
- Strong & Durable
- Clean Finish

A modern and attractive addition to your home

ROOFING LAYER

Solar Span's roofing layer is made from Hi-Tensile Bluescope Colorbond steel for strength & durability in a range of thermally efficient & modern colours.

INSULATION LAYER

Made from a polystyrene core available in various thicknesses 50—150mm. Each panel incorporates a service duct for electrical cabling for ceiling lights & fans.

CEILING LAYER

Made from Bluescope Colorbond steel, available in 2 finishes coloured Surfmist (off white) similar to an internal ceiling finish.
